

Retrofit LED Module

Retrofit LED Module

RETROFIT LED MODULES: the easy way to refit conventional TRAFFIC signals With Retrofit LED Module, COLOZUZ underscores its position and know-how in LED signaling technology. Over 10 years of experience in the development and over 5 years of experience in the manufacture of LED traffic signals module allow us to offer highly reliable and stable products. The central light source combined with the dual lens system enables a brilliant and very uniform signal display.

- no LED dots visible, very uniform signal glow – central light source
- highest anti-phantom performance (class 5)
- low power consumption and brilliant light output
- custom-made masks allow any symbol display
- life cycle > 5 years
- optimum heat balance reduces degradation to a minimum
- proven technology – used REBEL LEDs
- dimming function as standard solution
- available with clear and smoked lens
- compatible with standard-conforming signal head housings
