

Traffic Signals

Traffic Signals

Well developed design concept is hard to improve. Our Traffic Signals – complete polycarbonate traffic signal head – remains the state of the art standard in many countries due to its robust design, reliability, and universal usability. Our Traffic Signals can be supplied with different types of LED light sources. Manufactured using UV-stabilized polycarbonate, our Traffic Signal is particularly resistant to mechanical stress, adverse weather conditions and UV radiation. Its modular design and constructional snap elements allow for easy signal maintenance. Customers appreciate the flexible fixing options combined with the robust signal body design. Meeting the highest requirements all over the world, our Traffic Signal is the most versatile traffic signal head available. Our Traffic Signal is easy to maintain and renowned for its classic ageless design.

- available in \varnothing 210 / 300 mm; combi signal (\varnothing 300 mm + \varnothing 210 mm)
- in combination with LED Module optics very low power consumption and brilliant light output
- proven technology
- longevity and robustness of operation
- easy access for maintenance
- vandal-proof design
- any type of lens with customized symbols can be delivered on request
